

# Using an Infrared Thermal Camera to see the effectiveness before and after using the Wellness card

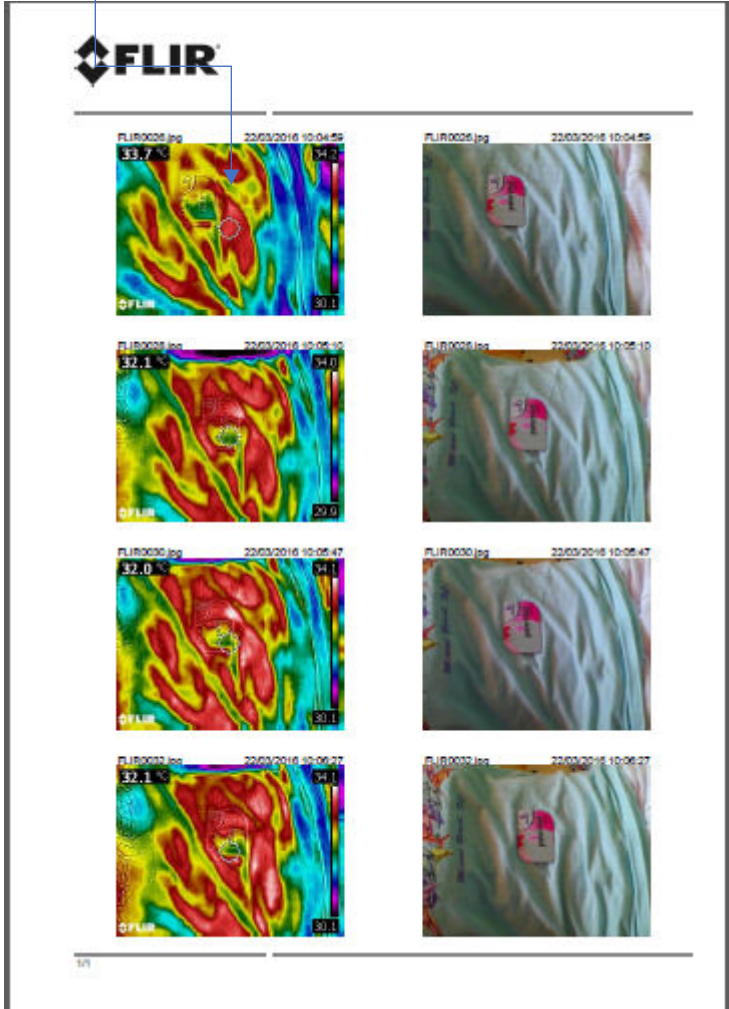

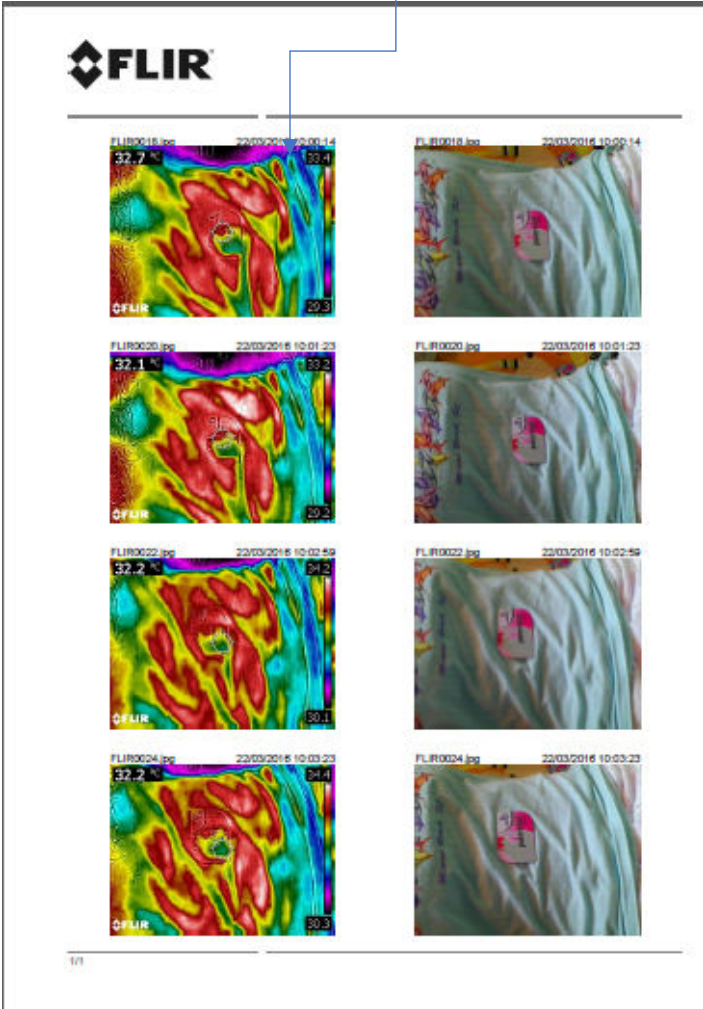

# Demo using a Pain Relief card on

Before using the card the body is more towards yellow in color

Body starts to get heated up by FIR and you can see it starts to be more red instead of yellow after few minutes of usage,

The body's microcirculation starts to work within 10 min as you can see from the pictures and those in red is to show that body's is heated up and there are reaction taking place. When cells are heated up they will create resonance effect and thereby body become activated and slowly the pain will be reduced.
